

TOPIC : GARDEN TOOLS & EQUIPMENT

GUEST SPEAKER : **Clint Kenny**

MALENY GARDEN CLUB MEETING : 28th JULY 2015

Clint is a young man with a passion for gardens, garden design, garden tools as well as chooks and horses! His business base and residence is in Warwick at The Laurels an historic homestead with a diverse country garden.

At the meeting, Clint showcased his “Garden Tool Shop” business. He spoke of his aim to provide the best quality traditional implements whilst catering for unique and purposeful tools. Many are imported from reputable European manufacturers. In opposition to today’s “disposable” world, Clint’s desire is to make available tools with the longevity to be handed on to the next generation.

Some of the items from the wide range of tools and accessories are:

- **Cobrahead** - described as a giant fingernail, it cultivates, mixes compost and churns through the soil
- **Spork** - a spade/fork which promotes less adhesion, less surface area and aeration of soil
- **Transplanter trowel** - good for nutgrass removal as well as transplanting bulbs
- **Plant cloche** - to nurture seedlings, deter pests, for frost protection or to hang as a light shade!

Facebook is used to advise of upcoming events and the website is very comprehensive. Of special interest are the links to Clint’s garden restorations in the Warwick area.
